

JAM working model

By function

Principles

Focus

Crush it at what matters most. Drop the rest.

Autonomy

Set expectations, build alignment, and trust the team.

Growth

Inspect the work and lean in where needed.

Ownership

Chris, Kai, and Lee - Lead the Build Org functional teams.

Ryan - Organize and drive the program.

ICs - Own the work to achieve agreed-upon outcomes.

Well yeah, but...

...this is missing important work (Focus).

Definitely. Is it truly critical for success? We'll add what matters most. Help me free you up by driving towards those outcomes.

...we solve things as a team (Autonomy).

Do we have time to be individual contributors on this work? Can we inspect the work and support strategically 1:1?

...I need to make sure we get it right (Growth).

Is the work 'mission critical'? Can we trust the team to do their best? Can we mentor strategically to facilitate growth over time?
